Agenda

3° Open Innovation Dialogue

17.30	Apertura del webinar
17.35	Keynote Speech – Andrea Durante
17.55	Keynote speech – Letizia Mortara
18.15	Tavolo di discussione con i Partner della ricerca
18.40	Saluti finali & Rinaraziamenti

Keynote Speech

Andrea Durante
Chief Al & Strategy Officer
Edor Corporation

Intelligenza Artificiale e Open Innovation

Evoluzione, velocità e cambiamento

ELDOR CORPORATION: EVOLUZIONE DELLA TECNOLOGIA

L'OPEN INNOVATION È PER TUTTI

L' Open Innovation non è un privilegio delle grandi imprese, ma un fattore abilitante per la crescita

MAPPARE L'UNIVERSO E IDENTIFICARE I SEGNALI DEBOLI

LIBERARE TEMPO UMANO PER LA STRATEGIA

PENSIERO LATERALE: CONNETTERE I PUNTINI ·

L'Al può trovare un contatto, ma la capacità di costruire relazioni di fiducia con i partner dell'ecosistema è una prerogativa esclusivamente umana

Il rischio umano più pericoloso è la 'Delega Cognitiva': la tendenza a fidarsi ciecamente degli output dell'Al, abdicando al pensiero critico e atrofizzando la nostra capacità di giudizio strategico

LA "DELEGA COGNITIVA"

NON POSSIAMO DELEGARE QUESTA RICERCA

Keynote Speech

Letizia Mortara

Associate Professor
Institute for Manufacturing
University of Cambridge

Migliorare i processi di innovazione con strumenti Al

Un framework e le sfide da affrontare

Outline

A framework to think about AI introduction, in any context, including OI Considering Adoption, Assessment and Adaptation in AI introduction

In open innovation AI can play various roles Mapping Controlling I - Al as soout III - All as forecaster II - Al as matchmaker Foreuning problems, opportunities, and side V - All as conductor Mapping potential embination of pariner disease knowledge VIII – All an vanguard VIII - All as broker IX - Al as custodian Evaluation of new business opportunities Guarding intellectual proper and (re)afocation of value capture Thijs et al. 2023 UNIVERSITY OF CAMBRIDGE Decision-making for Emerging Technologies

How do we adapt?

Much of AI is used to Augment – i.e. to make it easier for us, without giving up everything!

- We are not the only ones to use AI: is the competitive game changing? Where is the unique competitive edge where AI is a resource?
- **Humans are developing mechanisms to control AI:** we are changing jobs, roles, processes (are we controlling the input, the output, where AI enters in the process?)
- What type of AI for what type of task? Not all AI are the same. Analytical vs generative AI.
- Can we use AI appropriately? Do we have the right skills to interact with AI understanding the limits and consequences?
